

MASHIEL KHAN

Software Developer

☎ 03134025082 ✉ mashielkhan2@gmail.com 📍 Lahore, Pakistan 🌐 github.com/Mashielkhan

Profile

Computer Science student with experience in software development, web applications, machine learning, and data structures. Skilled in Python, React, Flutter, JavaScript, and problem solving. Seeking a software development internship to apply technical skills, contribute to real-world projects, and continue growing as a software engineer.

Education

BS Computer Science

2023 - Current

University of Central Punjab (UCP), Lahore

Skills

Python • C++ • Java • JavaScript • React • HTML • CSS • Flutter • React Native • SQL
• Machine Learning • Prompt Engineering • Git • Data Structures & Algorithms • OOP • DBMS
• System Design

PROJECTS

AppVision (React Application)

- Developed a React-based web application using reusable components and modern frontend practices.
- Implemented responsive user interfaces and dynamic content rendering.
- Focused on performance, usability, and maintainable code structure.

Study Buddy – Smart Learning & Study Management Platform

- Built a platform for managing study schedules, tasks, and academic goals.
- Designed user-friendly interfaces and productivity-focused features.
- Applied modern web development concepts to improve user experience.

Neon Trail – Arcade Web Game

- Developed a browser-based arcade game using HTML5 Canvas and JavaScript.
- Implemented multiple levels, power-ups, enemy AI, score tracking, and progression systems.
- Added support for desktop and mobile controls with responsive gameplay.

Smart House Price Prediction System

- Built a machine learning model for house price prediction using data analysis techniques.
- Performed preprocessing, training, evaluation, and prediction workflows.
- Applied machine learning concepts to solve real-world problems.

File System Organizer Using Trees and File Indexing

- Designed a tree-based file organization system with efficient search capabilities.
- Implemented indexing concepts and file management operations.

Library Management System

- Developed a BST-based library management application for efficient book storage and retrieval.
- Implemented search, insertion, and management operations using data structures.
